

Project Design Phase-II Data Flow Diagram & User Stories

Date	29 September 2026
Team ID	SWTID-2026-9956
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
IT Administrator	Custom Ticket Management	USN-1	As an administrator, I can create a custom table to store ticket information in a structured format.	The custom table contains all required ticket fields.	High	Sprint-1
Customer / Caller	Ticket Creation	USN-2	As a customer, I can create an IT support ticket by providing my issue description.	The ticket is successfully created with the submitted issue details.	High	Sprint-1
IT Support Staff	Automatic Classification	USN-3	As an IT support staff member, I can have the system automatically classify the ticket based on the issue description.	The correct Category and Subcategory are assigned automatically.	High	Sprint-1
Customer / Caller	Automated Notification	USN-4	As a customer, I can receive an automated email notification when my ticket is created.	A confirmation email containing the ticket information is sent automatically.	High	Sprint-2
IT Administrator	System Maintenance	USN-5	As an administrator, I can easily update Categories, Subcategories, and ticket fields when requirements change.	Changes can be made without redesigning the entire ticket management system.	Medium	Sprint-2
